bioIQ®

Simplify onsite screening events with BioIQ HealthSync

Create seamless screening events with BioIQ HealthSync for iPad and Android tablets. Configure event options in advance from the BioIQ Administrative Console, creating defined workflows for clinicians hired to run the event. From the app, clinicians can manage appointment calendars, check in and screen participants digitally, and sync screening data to the secure BioIQ Platform to quickly share results.

BioIQ HealthSync Enables

Streamlined Event Management

Streamline events with stations for check-in, measurements, post-service questions and review. Access appointment schedules to check in participants, or sign up walk-ins on the spot. Manage the event from start to finish within the app, eliminating paper forms.

Digital Results Capture

Enter screening results directly into the app and automatically sync participant results with their BioIQ Participant Portal accounts. Automatically capture lipid profile, cholesterol and glucose readings via a Bluetooth integration with the Alere Cholestech LDX Analyzer.

Seamless Participant Experience

Quickly access participant records, capture consent and insurance information, and begin the screening process. At the end of the screening, review results with participants, provide custom recommendations, and configure prompts to sign up for additional wellness programs. recommendations based on their screening results.

Rapid Intervention

BioIQ HealthSync displays reference ranges when a participant and clinician are reviewing biometric results together. Reference ranges classify certain biometric results as normal, of caution, or of risk, enabling at-risk individuals to discuss results with the clinician and take appropriate next steps.

Elements of the BioIQ Platform

BioIQ Administrative Console

Set up and customize at-home, onsite and remote screening programs, send communications and reminders to participants, track program progress, and analyze results, all from a single location.

Program design

Communication tools

Enrollment configuration

Program progress tracking

Reporting and analytics

BioIQ Participant Portal

Create a customized portal to provide participants a seamless experience, including access to appointment scheduling, easy-to-read results, incentives tracking and resources that address individual health risks.
